listing Description

The Carpet Man has been in business for many decades. We have a customer-centric and only quality product policy. We love making our clients happy. We want them to be pleased with their new flooring, and when they refer us to their friends and family, that is truly rewarding! We strive to not only outdo the "big box" competitors with personal service and competitive pricing, but our installation crews are experienced with many years in their specialized fields. And with flooring, that is one of the key ingredients. We have thousands of samples! These samples could be checked within the conditions of your home. After your call we can schedule an in-home estimate to get the accurate square footage.
